

# BIG WAVE

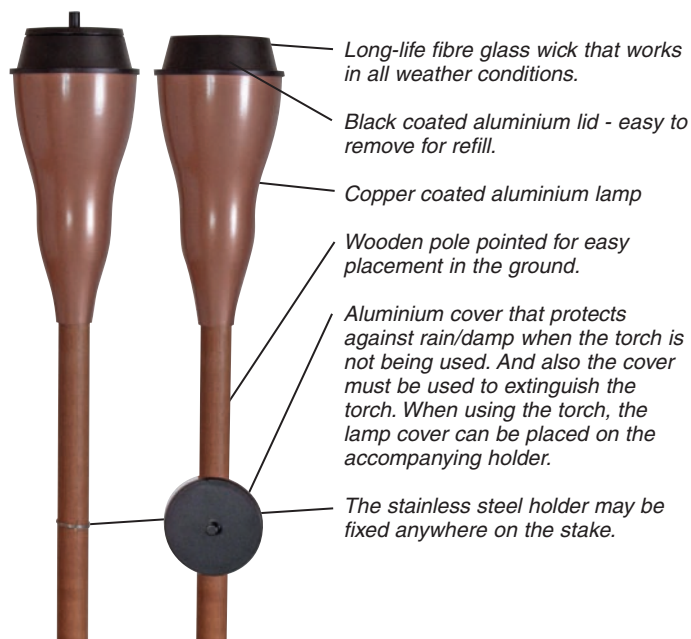

157 cm

# Advanced Burning Control

(Pat. pending)

Advanced Burning Control is a new and advanced burning system, which unlike traditional single flame torches, creates a bon fire in it's patent pending combustion chamber. The burning of the oil gasses allows a very clean and minimum smoking torch without the hazard of flying embers and sparks. Big Wave is also equipped with a click lid for extra safety if the torch falls over. The fire is also easily extinguished with the snuffer. Big Wave is available in the colours: Silver, Copper, Ivory and Black.
